OBJECTIVE

To enhance my career up to the level in which I can get better opportunity and to apply from my education and experience to achieve company goals and objectives.

EXPERIENCE

Sunbonn

Senior Software Engineer (iOS Developer And React Native)   Jan 2019 – Present

React-Native Developer
Currently developing a react-native app for restaurants app for user and delivery rider to handle for multiple clients.

iOS Developer
Developed a social media app which was a combination of other social media apps like (Facebook, Instagram, Snapchat, WhatsApp, etc.) which is available on the app store, and link can be provided on request.
Completely managed by myself which includes project management, Development and Client Handling.

- Worked on Google Maps Modules like Clusters, Marker, Location Search, Location Detection Like Careem.
- Real-Time Chat using Firebase Firestore.
- Media Management Like (Image, Video, Text Editor, Link, Audio).
- Collaborated with other team members to get the work done.
- Add business app module to the app
- Giving App demos to International clients.
- Weekly Status Reports to Clients
- Project Planning

Centric-DXB   Dec-2017 –Jan 2019
Android & IOS Developer

- Developed "Events" Mobile App (Android and iOS) to launch it as product for company, handling different flavours in Android and different Targets in iOS for different Clients. **"Ninth Degree Car Events"** and **"Centric Prestigious Events".**
- Developed a Social Polling app **'Askofy'** for iOS from Scratch and maintaining android version.

A user can ask a different trending questions by creating new hash tags and can use previous hash tags and get an honest feedbacks from user.

- Working with team to get better understanding of products and integrating new features to the applications.
- Worked on Google maps to track **real-time** location of an object, drawing path between two point and added markers to different location on Google map.
- Worked on **Pusher API** to integrate real-time communication between Client and Server.

Right Solutions: Feb-2016 –Dec-2017
-Android Developer &-IOS Developer

- Developed Apps From the Scratch to Deployment and tested high-quality Android and iOS Applications that included **Maps**, **Payment Solutions (PayPal, SADAD and Pay Fort)**, **Animations**, **Social Networks API's**, **Push Notifications (GCM & FCM)**, **App Localizations (Arabic)**, **Fit Kit API and server-side** integrations.
- Fixed bugs and improved application performance.
- Partnered with artists, QA, and internal developers to maintain best practices.
- Wrote clean, clear, efficient, well-tested, and maintainable code.
- Ensured content met or exceeded business and client requirements.
